CURRENT CONDITION AND PLAN OF ACTION

SEDIMENT	<input type="checkbox"/> GOOD CONDITION <input type="checkbox"/> BOTTOM EXCAVATION 5-10 YRS <input checked="" type="checkbox"/> NEEDS EXCAVATION SOON	
BANK STABILITY	<input type="checkbox"/> BANKS GOOD <input checked="" type="checkbox"/> BANKS STEEP LESS THAN 1.5:1 <input type="checkbox"/> RIP RAP NEEDED	Lower end standing water with soft mushy banks
OUTLET PIPES	<input type="checkbox"/> GOOD CONDITION <input type="checkbox"/> NEED REPAIR	
VEGETATION	<input type="checkbox"/> GOOD CONTROL <input type="checkbox"/> NEEDS MOWING <input checked="" type="checkbox"/> BRUSH <input checked="" type="checkbox"/> CATTAILS <input checked="" type="checkbox"/> PHRAGMITIES	Large trees east of Gordon Rd and light brush west of Gordon Rd
FUTURE	2020	2021

Located between Portage River South Road and the Portage River, this ditch outlets into the Green Bayou approximately 1300 east of Green Bayou Drive. Approximately 700' east of Green Bayou Drive is marsh. Original design outlet elev. was 571.00 and ditch design grade varies from 0.03%-0.07%. At times backwater influence is up to or west of Gordon Road..Cattails and phragmites are a problem east of Green Bayou Drive. This area is mowed back and clear downstream as far east as equipment can work There are larger trees and brush in two sections between Green Bayou Dr. and Gordon Rd. West of Gordon Rd is light brush. A bottom excavation is needed and will give some benefit especially west of Gordon Rd, but landowners need to install filterstrips to help prolong the usefull life. Continue to do control for brush to gain access for an excavation. Due to water levels it appears that this project will not be able to be restored to the original design elevations. Mow and or brush spray for control in 2019. This is an ongoing battle on brush and cattails.
